

Name: \_\_\_\_\_ Date: \_\_\_\_\_

1. What is one basis for making search assignments?
  - a) Grid location   b) Floor texture   c) Dead reckoning   d) Stairway locations
2. What area is the first search priority?
  - a) The area immediately around the fire   c) The top floor
  - b) The exterior of the structure   d) The area directly inside the main egress
3. Adults who try to escape a fire on their own are often found in one of two locations. What is one of those?
  - a) In the attic   b) In a closet   c) In the middle of a room   d) Near a door
4. What is another term for a clockwise search of a room?
  - a) A forward search   c) A split search
  - b) A Carolina search   d) A left-hand search
5. What is the rule about the point of exit when doing a primary search of a room?
  - a) Exit through a different door than the one you entered.
  - b) Exit through the same door you entered.
  - c) Exit through the first door to the left of the one you entered.
  - d) Exit through the first door to the right of the one you entered.
6. Can a thermal imaging device see a person in the dark?
  - a) Yes, but only if the person is wearing a special thermally active suit
  - b) No, not unless the person's clothing is on fire
  - c) Yes
  - d) No

7. When is a secondary search performed?
- a) After the fire is under control or fully extinguished
  - b) Immediately upon completion of the primary search
  - c) Only when the primary search discovered no victims
  - d) Only when the primary search discovered victims
8. If fire fighters become disoriented and must rely on the hose line to find their way out, how can the couplings help?
- a) The male couplings point toward the nozzle.
  - b) The male couplings point toward the way out.
  - c) The couplings do not indicate direction, but can be banged on the floor to signal for help.
  - d) The Higbee cut points toward the side of less pressure.
9. What exception is there to the two-in/two-out rule?
- a) None—there are no exceptions allowed
  - b) Can be waived if not enough people are on hand to enact
  - c) Imminent life-threatening situation where immediate action can save life
  - d) Waiving of this right of protection by entering fire fighters
10. What condition is the victim in when the exit assist is appropriate?
- a) Unresponsive and unable to walk
  - b) Unresponsive, but able to walk
  - c) Responsive, but unable to walk
  - d) Responsive and able to walk
11. When is the two-person chair carry particularly useful?
- a) Across open fields
  - b) Going under low obstacles
  - c) In elevators
  - d) In narrow corridors
12. When using the clothes drag, what, if anything, supports the victim's head?
- a) The rescuer's arms
  - b) The victim's arms
  - c) The victim's hands
  - d) A roll of blanket

13. What type of drag provides a faster removal from a dangerous area than some other drags?
- a) Clothes drag
  - b) Blanket drag
  - c) Lower extremities drag
  - d) Webbing sling drag
14. What is one attractive feature of the fire fighter drag?
- a) It requires no equipment to carry out.
  - b) It can be done in a toxic environment without SCBA.
  - c) It can be used when the victim is heavier than the rescuer.
  - d) It works just as well as a water-rescue technique.
15. What piece of equipment should always be used when removing a victim from a vehicle, if possible?
- a) A hydraulic ram
  - b) A figure-8 sling
  - c) A long backboard
  - d) A spring-loaded center punch
16. All ladder rescues should be performed with a certain number of fire fighters whenever possible. How many?
- a) 4
  - b) 3
  - c) 2
  - d) 1
17. How should an unconscious child be carried down a ladder?
- a) Vertically, in the crook of one arm
  - b) Cradled across the rescuer's arms
  - c) Across the shoulders
  - d) Over one shoulder
18. How should the body of someone who has died be moved?
- a) Same as any other person
  - b) In a body bag, only
  - c) In a body bag and on a backboard
  - d) By mechanical conveyance only
19. Given the choices of 1) ground ladder, 2) aerial ladder, and 3) elevating platform, which is the method of choice for rescuing people from a height?
- a) Ground ladder
  - b) Aerial platform
  - c) Either ground ladder or aerial platform
  - d) Aerial ladder

20. When rescuing an unconscious child or small adult from a window, how many rescuers enter the window to assist the victim?
- a) 0   b) 1   c) 2   d) 3

## **Answer Key**

1. d
2. a
3. d
4. d
5. b
6. c
7. a
8. b
9. c
10. d
11. d
12. a
13. d
14. c
15. c
16. c
17. b
18. c
19. b
20. b
