

**BINGO**  
**CTAE Resource Network, Curriculum Office**  
**March, 2009**

**Directions for the Instructor**

1. Print the bingo cards. Twenty six different cards are included. Print additional cards at random if needed. Cut each sheet to separate the cards. Cards may be laminated for durability.
2. Give each student a bingo card and chips, markers, or scrap paper. If paper is to be used, ask students to tear or cut 25 pieces of paper about one-half inch square. If the cards have been laminated, students can mark their cards with erasable markers.
3. Explain to the students that you will read the definitions to the class and that they should mark the correct answer on their card. Note that all cards do not have all the answers.
4. Read the definitions only, at random, from the definitions list. Mark the definitions that have been used. The student should place a chip on the cell with the correct response.
5. When a student has placed chips on 5 spaces in a row (diagonally, vertically, or horizontally) the student should call "Bingo". Ask the winning student to call out their answers. Check their answers to make sure those definitions have been used.

**Optional Bingo Variations:**

- T-Bingo: The card must be marked in the shape of a "T" to call Bingo.
